She helped me just enough to give me a clue to the answer, and then said if I keep working as hard and have the massive interest in science that I do, I have a one way ticket out of this town. The only thing that I had to do was to keep working hard and decide to put that ticket to work.

Craig Ollinger ~~ Pharmacy
Lisa Faber ~~ Mathematics

Math always came easy to me until my freshman year. I got off track somehow and when I got into Mrs. Fabers class she made it fun again and her concepts of learning were much clearer and I'm so grateful that she was able to get me back on track.
